

Skier triggered loose snow in Beehive Basin

Beehive Basin
Northern Madison
2/4/2024
Code
L-AS-R1-D1
Elevation
9400
Aspect
W
Latitude
45.33430
Longitude
-111.38600
Notes

Multiple natural avalanches and at least one suspected human triggered dry loose in Beehive Basin. Most naturals appeared to have run either last night or yesterday (2/3/24), with a couple potentially older slides. New snow and rapidly changing cloud cover/depth perception made it a bit hard to be sure. Suspect one skier triggered dry loose in W facing trees. One of the W-facing chutes further up valley was also observed to have a crown line at approximately 9000' (no photo)
