

Wind-Slab Avalanches in Bridger Range

The Ramp
Bridger Range
3/27/2024
Code
SS-NC-R2-D2-I
Aspect
E
Latitude
45.82880
Longitude
-110.93100
Notes

On our drive home we saw, what I assume were, natural wind-[slab](#) avalanches on Quarter Saddle (looked like a [cornice collapse](#)) and in Argentina Bowl. Bridger Peak was obscured by heavy wind-[loading](#). There was a small wind-[slab](#) release out of Gibbs (I think), I suspect skier triggered, but I could make out a [track](#).

Number of slides
4
Number caught
0
Number buried
0
Avalanche Type
Soft slab avalanche
Trigger
Cornice fall
R size
2
D size
2
Bed Surface
I - Interface between new and old snow
Problem Type
Wind-Drifted Snow
